[Portfolio](#)

SUMMARY

Computer Engineering graduate specializing in Software Engineering, with a strong focus on front-end web development. Experienced in building responsive and interactive user interfaces using HTML, CSS, JavaScript, Bootstrap, and React. Passionate about creating clean, user-friendly designs, improving UI/UX, and continuously learning modern front-end technologies. Seeking a Junior Front-End Developer opportunity. also have some experience with the Django framework and back-end development.

COURSES

Frontend Web Development Training – Route Academy

September, 2025 – March 2026

Completed an intensive, hands-on training program focused on modern frontend development technologies and best practices. Gained strong experience in building responsive, scalable, and accessible web applications from scratch.

- Developed structured and semantic web pages using HTML5 and styled them using CSS3 and SASS, with a focus on clean, maintainable, and reusable code
- Built responsive and mobile-first designs using Bootstrap and modern layout techniques (Flexbox & Grid)
- Implemented interactive web features using JavaScript (ES6+), including DOM manipulation, event handling, and API integration
- Applied Web Accessibility principles to ensure websites are usable for all users
- Used jQuery for simplifying JavaScript tasks and enhancing UI interactions
- Built dynamic single-page applications using React.js, including components, props, state management, and lifecycle methods
- Worked with Next.js for building optimized and SEO-friendly web applications
- Used TypeScript to improve code quality, scalability, and maintainability
- Integrated TanStack Query (React Query) for efficient data fetching, caching, and synchronization
- Managed forms effectively using React Hook Form (useForm) with validation
- Practiced Regex (Regular Expressions) for input validation and data processing
- Focused on performance optimization, code organization, and best development practices

Digital Egypt Pioneers Program – Cairo, Egypt

November 2024 - May 2025

Completed a focused training program in front-end development, specializing in building interactive and dynamic web applications using React.js.

- Developed strong hands-on experience with JSX, reusable components, props, state management, and React lifecycle concepts
- Built multiple small-scale projects utilizing React Hooks and React Router to create seamless single-page application (SPA) experiences
- Implemented RESTful API integration and handled dynamic data rendering efficiently
- Integrated front-end applications with back-end services using Fetch API and Axios
- Enhanced UI/UX through component-based architecture and responsive design principles
- Applied best practices for writing clean, maintainable, and scalable code

Completed a comprehensive full-stack development training program covering both front-end and back-end technologies.

- Built multiple responsive web applications using HTML, CSS, JavaScript, and Bootstrap for modern UI design
- Learned how to design and consume RESTful APIs using HTTP methods (GET, POST, PUT, DELETE)
- Developed end-to-end applications connecting front-end interfaces with back-end logic and database operations
- Completed a graduation project simulating real-world application flow from user interface to server-side functionality and data management
- Collaborated in team environments using Git and GitHub for version control and code sharing
- Strengthened problem-solving skills through debugging, testing, and performance optimization

EDUCATION

Bachelor of Computer Engineering

Modern Academy for Engineering and Technology – Cairo, Egypt

- Specialization: Software Engineering
- Graduation Year: 2025
- GPA: 3.2 / 4.0

I have studied essential principles of computer science and software engineering, including:

- Object-Oriented Programming (OOP)
- Data Structures
- Databases
- Software Architecture
- Web Development

Through academic coursework, lab sessions, and collaborative projects, I have developed robust analytical and problem-solving skills.

I participated in practical academic projects that emphasized real-world problem-solving, system design, and software development methodologies.

Final Year Project: Smart Parking Management System

I designed and developed a comprehensive backend system utilizing Django REST Framework and MySQL, which included:

- Implementation of a secure user authentication and authorization system
- Development of garage and parking slot management features
- Creation of real-time reservation and booking logic
- Design and structure of RESTful APIs for effective system communication
- Assurance of scalable and efficient database design

Project Grade: Excellent (A+)

TRAINING & INTERNSHIPS

YAT Education Center – Web Development Training

Completed a web development training program focused on front-end technologies and modern web practices. Gained hands-on experience in building responsive websites using HTML, CSS, JavaScript, and Bootstrap, with exposure to real project workflows and team collaboration.

Rashid Petroleum Company – Internship

Participated in a professional training program at Rashid Petroleum Company, gaining insight into enterprise-level systems and software applications used in the industry. Developed awareness of how IT solutions support operational processes and business workflows.

Khalda Petroleum Company – Internship

Completed training at Khalda Petroleum Company, gaining practical exposure to corporate work environments and technical systems. Strengthened communication, teamwork, and problem-solving skills while observing real-world industrial applications.

TECHNICAL SKILLS

- **Frontend Development:** HTML5, CSS3, JavaScript (ES6+), Bootstrap, SASS, jQuery, React.js, Next.js, TypeScript, Tailwind
- **React Ecosystem:** React Hooks, React Router, State Management, Component-Based Architecture, TanStack Query (React Query), React Hook Form
- **API Integration & Communication:** RESTful APIs, Fetch API, Axios, HTTP Methods (GET, POST, PUT, DELETE), JSON Handling
- **Web Development Fundamentals:** Responsive Web Design, Mobile-First Design, UI/UX Principles, Web Accessibility, Cross-Browser Compatibility, Performance Optimization
- **Programming Concepts:** Problem Solving, Object-Oriented Programming (OOP), Data Structures Fundamentals, Regular Expressions (Regex)
- **Tools & Version Control:** Git, GitHub, VS Code, Agile Basics

SOFT SKILLS

- Teamwork, Communication Skills, Problem-Solving, Time Management, Adaptability, Attention to Detail, Critical Thinking, Collaboration in Agile Teams
